Hi Chad

Our request is to increase from the agreed max 45k per day / average 37k per day, to 60k max per day / 52k average per day. Table below shows agreed (called Actual) and the requested higher amount (called Potential), as well as GPM depending on the number of hours per day we are allowed to pump water to you. The reason for this request is that this will allow us to find an acceptable solution (both in size and location) more easily for our new holding pond.

	Average	Vol / 6h	Vol/ 24h	Max	Vol / 6h	Vol/ 24h
	GPD	GPM	GPM	GPD	GPM	GPM
Actual	37,000	102	26	45,000	125	31
Potential	52,000	145	36	60,000	167	42

Our questions are:

- What is the max volume/day we could send
- What are the periods we can send the water during each day (with a min and a max?). Example: 6 to 8 hours or 18 to 20 hours per day
- What do we need to do in the coming days in order to gain approval from the board on Monday for this request? We would create an amendment to the outside services agreement we have for the increased amount, so no need to completely re-do the contract

Thanks

Andy
